

Serviss Missions

Happy Resurrection Day!

March/ April 2023

Hello Friend,

Mark just got back from Ukraine and reports there were delays crossing Moldova border which proved to be a good thing as a missile hit the road in Ukraine that we would be traveling on, a little while before we got there (see photo). Delays can definitely prove to be a God thing!

Once in Ukraine, we learned that a drone had killed an American humanitarian aid worker a few days before, and that many aid groups were leaving due to increased fighting. Our first full day in Ukraine, 32 missiles went off in the city. Sirens blared, curfew was in effect and the electricity went out. I preached a couple times in the dark in the basement church even as generators cranked up. The pastor there told us many pastors were leaving and did I want to leave too?

I said 'no.' I preached on the believer's authority, trust and standing without fear. It was a packed house and a victorious time!

This was not my first time preaching in Ukraine. The area I ministered in seven years ago is now under Russian control. The pastor wanted to take me one mile from the Russian occupation to preach, which I was excited to do, but it got canceled at the last minute.

However, we got to feed many homeless and war-displaced individuals, and Serviss Missions paid for all of it. Thank you for giving! Thank you for praying! More to come!
